

NYALIC INDUSTRIAL

Project: Beaufort Signage

- Large double sided acrylic illuminated sign and rejuvenate
- Replacement cost of signage \$12,000.00 NZ
- Resolution: Clean with Simple Prep/Right Rinse and apply 2 coats Nyalic

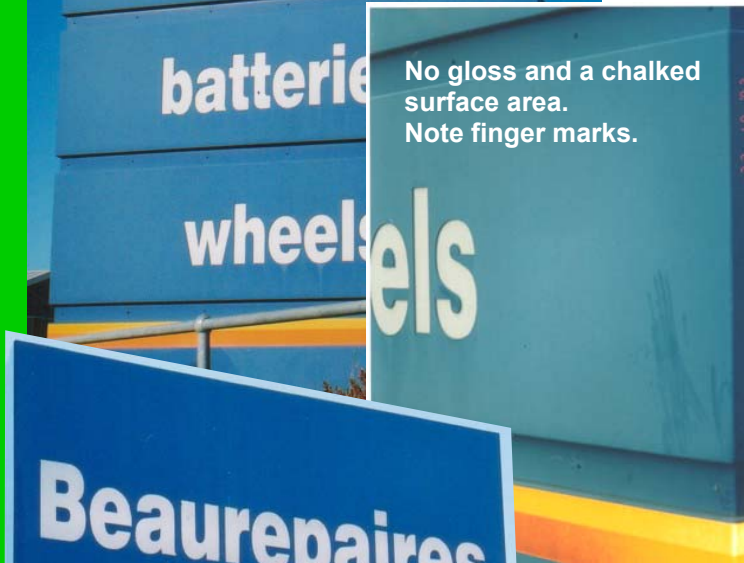

Result: Client is very happy knowing that this project saved him over \$10,000

The finished result shown below and left is strikingly obvious... Not only has Nyalic restored the gloss to the acrylic, it is now sealed from the extremes of automobile pollution and fumes...

- Importantly this signage is now self cleaning.
- Little time was lost
- Sign recovery was economic

The gloss is well shown by the reflection of the Cherry Picker.... A project completed over two days, and its double sided.....

Call for investment costs

No gloss and a chalked surface area.
Note finger marks.
